PCT/KR2004/003224

(II)

23

What is claimed is:

1. A compound of Formula II below:

5 wherein

 R_1 is a p-nitrobenzyl or p-methoxybenzyl group; and R_2 and R_3 may be identical to or different from each other and are each independently a C_{1-6} alkyl or aryl group, or a derivative thereof.

10

2. A process for preparing a compound of Formula II below:

wherein

 R_1 is a p-nitrobenzyl or p-methoxybenzyl group; and R_2 and R_3 may be identical to or different from each other and are each independently a C_{1-6} alkyl or aryl group, by coupling a compound of Formula IV below:

(IV)

PCT/KR2004/003224

24

wherein R_1 is a p-nitrobenzyl or p-methoxybenzyl group, or a derivative thereof, with 2-aminoethanethiol hydrochloride in the presence of a base, followed by reaction with a ketone.

5

- 3. The process according to claim 2, wherein the ketone is selected from the group consisting of acetone, methylethylketone, diphenylketone, and mixtures thereof.
- 4. The process according to claim 2 or 3, wherein the compound of Formula IV or a derivative thereof is obtained by condensing a compound of Formula III below:

(III)

wherein R_1 is a p-nitrobenzyl or p-methoxybenzyl group, 15 with diphenylchlorophosphate in the presence of a base.

5. The process according to claim 4, wherein the reaction solvent is a mixed solvent of acetonitrile and tetrahydrofuran.

20

6. The process according to claim 4, wherein the reaction temperature is within the range of 0°C to -10°C .

PCT/KR2004/003224

25

7. A process for preparing the compound of Formula I below:

(I)

by reacting a compound of Formula II below:

(II)

5 wherein

10

15

 R_1 is a p-nitrobenzyl or p-methoxybenzyl group; and R_2 and R_3 may be identical to or different from each other and are each independently a C_{1-6} alkyl or aryl group, with isopropylformimidate or benzylformimidate in the presence of a base to obtain a compound of Formula V below:

(V).

wherein R_1 is a p-nitrobenzyl or p-methoxybenzyl group, hydrogenating the compound of Formula V in the presence of a metal catalyst, separating the hydrogenated compound, and crystallizing the separated compound in the presence of an alcohol or ketone.

8. The process according to claim 7, wherein the hydrogenation

PCT/KR2004/003224

26

is carried out in the presence of a palladium catalyst containing an excess of water under a hydrogen pressure of $4-6~{\rm kg/cm^2}$.

5 9. The process according to claim 7, wherein the reaction solvent is a mixed solvent of water and tetrahydrofuran.
